This is a very scarce book which, although cheaply printed on thin paper, also includes some very attractive if unrefined handcoloured illustrations. The frontispiece depiction of the goddess Flora is particularly weird. The text covers all species of British flora, with tips on cultivation and care, but is especially useful in its concise discussion of the medical properties of hundreds of plants. This was clearly intended as a manual for domestic use and the list of diseases that can be treated with home remedies is exhaustive."--Antiquarian bookseller's description, 2015. Featuring galactic conspiracies, epic interstellar missions, and three rebel captains at the front of an interplanetary war, this explosive collection includes all five novels plus a bonus short story. War looms on the horizon... After the colonization of Mars and Europa, it took us fewer than five generations to reach beyond our solar system and discover new planets capable of supporting human life. Too far away to be governed under Earth law, the Collective was formed. Several hundred years later, the Collective has expanded to a system of six worlds. Power struggles and unequal rights have made interplanetary war all but inevitable. With rebellions arising across the Collective, three captains launch near-suicidal missions to free the oppressed fringe and reset equality across the stars. A

galactic war is coming, and only an arthritic mail runner, a space pirate, and a renegade warship commander can prevent an interstellar armageddon.
