Living Wages Around the World Jul 11 2021 This manual describes a new methodology to measure a decent but basic standard of living in different countries and how much workers need to earn to afford this, making it possible for researchers to estimate comparable living wages around the world and determine gaps between living wages and prevailing wages, even in countries with limited secondary data.

Human Impacts on Amazonia Aug 20 2019 Of late, religion seems to be

everywhere, suffusing U.S. politics and popular culture and acting as both a unifying and a divisive force. This collection of manifestos, Supreme Court decisions, congressional testimonies, speeches, articles, book excerpts, pastoral letters, interviews, song lyrics, memoirs, and poems reflects the vitality, diversity, and changing nature of religious belief and practice in American public and private life over the last half century. Encompassing a range of perspectives, this book illustrates the ways in which individuals from all along the religious and political spectrum have engaged religion and viewed it as a crucial aspect of society. The anthology begins with documents that reflect the close relationship of religion, especially mainline Protestantism, to essential ideas undergirding Cold War America. Covering both the center and the margins of American religious life, this volume devotes extended attention to how issues of politics, race, gender, and sexuality have influenced the religious mainstream. A series of documents reflects the role of religion and theology in the civil rights, feminist, and gay rights movements as well as in conservative responses. Issues regarding religion and contemporary American culture are explored in documents about the rise of the evangelical movement and the religious right; the impact of "new" (post-1965) immigrant communities on the religious landscape; the popularity of alternative, New Age, and non-Western beliefs; and the relationship between religion and popular culture. The editors conclude with selections exploring major themes of American religious life at the millennium, including both conservative and New Age millennialism, as well as excerpts that speculate on the future of religion in the United States. The documents are grouped by theme into nine chapters and arranged chronologically therein. Each chapter features an extensive introduction providing context for and analysis of the critical issues raised by the primary sources.

Palm Pre: The Missing Manual Nov 27 2022 If you've got your hands on this year's hottest new smartphone, you'll want the book that covers it inside and out: *Palm Pre: The Missing Manual*. This beautiful, full-color book from USA Today personal-technology columnist Ed Baig will help you go from newcomer to expert in no time. The maker of the legendary Palm Pilot is back on center stage with a smartphone that lets you browse the Web, listen to music, watch video, view pictures, and a lot more. *Palm Pre: The Missing Manual* provides you with everything you need to know to get the most out of this amazing mobile tool. Get to know the touchscreen, and learn to navigate by tapping, swiping, dragging, flicking, and pinching Link your contacts,

merge calendars, combine email accounts, and more by syncing your phone over the Web. Stay in touch with other people by using the Pre as a full-featured phone and organizer. Use it for email, texting, chatting, and as an efficient web browser. Take advantage of the Pre as a complete media center to store, sort, play, stream music and video, and sync with iTunes. Take and view photos, import images, and share them with others.

Ecology and Evolution of Plants under Domestication in the Neotropics

Jan 25 2020 The Neotropical area is a main setting of the earliest experiences of domestication of plants, and evolutionary processes guided by humans, which continue being active in the area. Studies comprised in this Research Topic show a general panorama about similarities and particularities of processes of domestication for different plant groups and regions, some of them illustrate how the domestication processes originated and diffused, how landscape domestication has operated and continues being practiced and others discuss some of the main challenges for designing policies for biosafety and conservation of plant genetic resources. It is an attempt to identify main topics for research on evolution under domestication, and opportunities that researchers can find in the Neotropics to understand how and why these processes occurred in the past and present.

Lost Crops of the Incas Mar 07 2021 This fascinating, readable volume is filled with enticing, detailed information about more than 30 different Incan crops that promise to follow the potato's lead and become important contributors to the world's food supply. Some of these overlooked foods offer special advantages for developing nations, such as high nutritional quality and excellent yields. Many are adaptable to areas of the United States. *Lost Crops of the Incas* includes vivid color photographs of many of the crops and describes the authors' experiences in growing, tasting, and preparing them in different ways. This book is for the gourmet and gourmand alike, as well as gardeners, botanists, farmers, and agricultural specialists in developing countries.

Parachute Recovery Systems Nov 22 2019 The purpose of this manual is to provide recovery system engineers in government and industry with tools to evaluate, analyze, select, and design parachute recovery systems. These systems range from simple, one-parachute assemblies to multiple-parachute systems, and may include equipment for impact attenuation, flotation, location, retrieval, and disposition. All system aspects are discussed, including the need for parachute recovery, the selection of the most suitable recovery system concept, concept analysis, parachute performance, force and

stress analysis, material selection, parachute assembly and component design, and manufacturing. Experienced recovery system engineers will find this publication useful as a technical reference book; recent college graduates will find it useful as a textbook for learning about parachutes and parachute recovery systems; and technicians with extensive practical experience will find it useful as an engineering textbook that includes a chapter on parachute-related aerodynamics. In this manual, emphasis is placed on aiding government employees in evaluating and supervising the design and application of parachute systems. The parachute recovery system uses aerodynamic drag to decelerate people and equipment moving in air from a higher velocity to a lower velocity and to a safe landing. This lower velocity is known as rate of descent, landing velocity, or impact velocity, and is determined by the following requirements: (1) landing personnel uninjured and ready for action, (2) landing equipment and air vehicles undamaged and ready for use or refurbishment, and (3) impacting ordnance at a preselected angle and velocity.

Miniature Crafts and Their Makers Jan 05 2021 Picture a throng of tiny devils and angels, or a marching band so small it can fit in the palm of your hand. In a Mixtec town in the Mexican state of Puebla, craftspeople have been weaving palm since before the Spanish Conquest, but over the past forty years that art has become more finely tuned and has won national acceptance in a market nostalgic for an authentic Indian past. In this book, Katrin Flechsig offers the first in-depth ethnographic and historical examination of the miniature palm craft industry, taking readers behind the scenes of craft production in order to explain how and why these folk arts have undergone miniaturization over the past several decades. In describing this "Lilliputization of Mexico," she discusses the appeal of miniaturization, revealing how such factors as tourism and the construction of national identity have contributed to an ongoing demand for the tiny creations. She also contrasts the playfulness of the crafts with the often harsh economic and political realities of life in the community. Flechsig places the crafts of Chigmecatitlán within the contexts of manufacturing, local history, religion, design and technique, and selling. She tells how innovation is introduced into the craft, such as through the modification of foreign designs in response to market demands. She also offers insights into capitalist penetration of folk traditions, the marketing of folk arts, and economic changes in modern Mexico. And despite the fact that the designations "folk" and "Indian" help

create a romantic fiction surrounding the craft, Flechsig dispels common misperceptions of the simplicity of this folk art by revealing the complexities involved in its creation. More than thirty illustrations depict not only finished miniatures but also the artists and their milieu. Today miniatures serve not only the tourist market; middle-class Mexicans also collect miniatures to such an extent that it has been termed a national pastime. Flechsig's work opens up this miniature world and shows us the extent to which it has become a lasting and important facet of contemporary Mexican culture.

Composting for Sustainable Agriculture Mar 27 2020 The dramatic worldwide increase in agricultural and industrial productivity has created severe environmental problems. Soil and groundwater reservoirs have been polluted with pesticides, xenobiotics and agro-chemicals. The global consensus to reduce inputs of chemical pesticides and agrochemical fertilizers, which are perceived as being hazardous by some consumers, has provided opportunities for the development of novel, benign sustainable crop management strategies. The future of agriculture depends upon our ability to enhance the productivity without damage to their long-term production potential. One of the strategies is the application of effective microbial products beneficial for both farmers and ecosystems. This kind of approach can ensure both ecological and economic sustainability. Soil microbial populations are immersed in framework of interactions, which are known to affect plant fitness and soil quality. For betterment of life of human being, improved quality and variety of products are formed due to versatile action of different group of microorganisms, Microbes are able to degrade solid waste material into compost which is a mixture of decayed organic matter, manure etc. Incomplete microbial degradation of organic waste where the microbial process varies aerobic to anaerobic form is stated as compost, if added to soil improves plant growth and development. The biological activities and microbial metabolism in the soil contribute to alter its mixture and fertility. Incorporation of organic remain in the form of compost is known to influence favourably the physio-chemical and biological properties of soil. The beneficial activities bestowed upon plants by compost utilization are multifaceted, hence most promising alternatives for achieving sustainable agricultural production. An increased awareness on compost has led to their use in agricultural concern. Contents in the present book will comprised various chapters on the role of beneficial bacteria in the composting process.

The application is depicted to achieve the attainable productivity besides, in disease management and suppressiveness of organisms of phytopathogenic in nature. Significance of the compost elicits certain responses e.g. soil reclamation, soil fertility, soil health and disease management exhibit due to quality compost amendment in soil. It serves as low cost prospective option for sustainable crop production and protection.

The Crisi Wartegg System (CWS) Jun 10 2021 The Wartegg Drawing Completion Test (WDCT) is a semi-structured, graphic, performance-based personality test, created by Ehrig Wartegg (1939). With a foundation in Gestalt and Psychodynamic theory, the WDCT has been used widely throughout Europe, South America, and Japan, but only recently has become available in the United States. Initial scoring systems for the WDCT were considered cumbersome and lacked research-driven validation. In response to these factors, Alessandro Crisi, following years of clinical practice and research, developed the Crisi Wartegg System (CWS; 1998, 2007), a normed and standardized administration, scoring, and interpretation system for the WDCT. Over the past three decades, Dr. Crisi has refined and expanded the CWS through research, broadening the scope of the measure, and increasing the accessibility of the system to clinicians. This manual provides a comprehensive guide to the CWS, made available to English-speaking clinicians for the first time.

Handbook of Sustainability Assessment Mar 19 2022 The Handbook of Sustainability Assessment introduces the theory and practice of sustainability assessment and showcases the state-of-the-art research. The aim is to provide inspiration and guidance to students, academics and practitioners alike and to contribute to the enhancement of sustainability assessment practice worldwide. It emphasises how traditional impact assessment practices can be enhanced to contribute to sustainable outcomes. Featuring original contributions from leading sustainability assessment researchers and practitioners, it forms part of the Research Handbooks on Impact Assessment series.

The Handbook of Mites of Economic Plants Jan 17 2022 Mites pose a serious problem to plants worldwide, attacking crops and spreading disease. When mites damage crops of economic importance the impacts can be felt globally. Mites are among the most diverse and successful of invertebrates, with over 45,000 described species, with many more thousands to be discovered. They are responsible for a significant portion of the losses of crops for food, fibre, industry and other purposes, and require expensive and often controversial pest control measures. Understanding these mites is vital for entomologists, pest researchers, agronomists and food producers. Knowledge of mite pests helps to inform control strategies and optimize the production of economic plants and the agrarian economy. This encyclopedia provides a thorough coverage of the mites and the problems they cause to crops, yet it is easily searchable, organised by mite species and subdivided into helpful headings. It takes a worldwide view of the issue of mites injurious to economic plants, describing mites prevalent in different regions and discussing control methods appropriate in different environments. This book provides an encyclopaedic reference to the major mites, described by family in terms of their internal and external morphology, bio-ecology and family systematics. Methods of mite collection and laboratory study is described, as well as species diagnostic characteristics, worldwide distribution, host plants, identification by the type of damage they cause and control strategies, including chemical and biological intervention and integrated pest management measures. Mites of the following families are included: (Eriophyoidea, Tarsonemidae, Tuckerellidae, Tenuipalpidae, Tetranychidae, Acaridae, Penthaleidae). Mites of Economic Plants is an important resource for students of entomology and crop production, and as a thorough reference guide for researchers and field workers involved with mites, crop damage and

food production.

Assessing Carbon Stocks and Modelling Win-win Scenarios of Carbon Sequestration Through Land-use Changes Nov 03 2020 This publication contains a methodology and software tools for assessing carbon stocks and modelling scenarios of carbon sequestration developed and tested in pilot field studies in Mexico and Cuba. The models and tools enable the analysis of land use change scenarios in order to identify in a given area (watershed or district) land use alternatives and land management practices that can both maximise food production, soil carbon sequestration and biodiversity and minimize land degradation. The aim is to develop and implement "win-win" options that satisfy the multiple goals of farmers, land users and other stakeholders in relation to food security, carbon sequestration, biodiversity and land conservation. The publication also contains a CD-ROM including three case studies and a Soil-C program demo, program and user manual.

CRC World Dictionary of Palms Sep 20 2019 From the Foreword Umberto Quattrocchi has brought us some amazing and useful works through the various dictionaries that he has compiled. This time it is for two very important plant families the palms and the cycads that are synthesized here in these two volumes. Each entry is fascinating not just for the botany and full nomenclature of the plant species but for all the associated uses, folklore and interactions with other organisms. ... These entries are fascinating glimpses of natural history. ... Botanists, conservationists, ethnobotanists, anthropologists, geographers, bird watchers, naturalists, historians and those of many other disciplines will find these volumes a most valuable and useful resource. It is the sort of book that will be in frequent use in my library. ----- Professor Sir Ghilleen Prance FRS, VMH, Former Director, Royal Botanic Gardens, Kew Following the same format as Umberto Quattrocchi's highly praised and well-used previous works, *The CRC World Dictionary of Palms: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology* brings

together the vast and scattered literature on palms and cycads to provide better access to information on these economically important plants. Each genus and species has a detailed morphological description and includes a list of synonyms and vernacular names in many languages. Bibliographies accompany each entry which are comprehensive, up-to-date and multi-lingual. The detailed information for every entry on habitats, economic uses, historical and biographical data, botanical exploration, and linguistics will be useful for any library involved with botany, herbal medicine, pharmacognosy, medicinal and natural product chemistry, ecology, ethnobotany, systematics, general plant science, agriculture or horticulture. Umberto Quattrocchi is the author of the bestselling CRC World Dictionary of Plant Names, winner of the prestigious Hanbury Botanical Garden Award. His most recent multi-volume work, CRC World Dictionary of Medicinal and Poisonous Plants, received strong praise as being "... an unparalleled starting place—a tool of first resort for any thoughtful researcher. Quattrocchi and CRC have delivered a dictionary like no other, a learned finger pointing in the right direction." —John de la Parra, Northeastern University, Boston, Massachusetts, USA, from *Economic Botany*, Vol. 68, 2014

Design Informed Sep 25 2022 The Power of Evidence to Create Design Excellence This practical, accessible book—for design professionals and students alike—is about design excellence and how to achieve it. The authors propose an evidence-based design approach that builds on design ingenuity with the use of research in ways that enhance opportunities to innovate. They show the power of research data to both reveal new design opportunities and convince stakeholders of the value of extraordinary work. A guide for all designers who want to earn their place as their clients' trusted advisor and who aspire to create places of beauty and purpose, the book demonstrates: An approach to applying evidence to design that neither turns designers into scientists nor requires large-firm resources The wide range of types of evidence that can be applicable to design and where to look for it Direct, practical application of the evidence-based design approaches in use today Provides tools to distinguish strong evidence that can improve design decisions from misleading assertions resulting from weak research Benefits of evidence-based design, including improved human and building performance Two featured case studies illustrate the theory and practice of evidence-based design. The work of the authors' 2005–2007 AIA College of

Fellows Benjamin Latrobe Research Fellowship provided an empirical foundation for this book, and addresses the use of rigorous research methods to understand relationships between design choices and health outcomes. The California Academy of Sciences, designed by Renzo Piano Building Workshop, Chong Partners Architecture, and Arup, provides transparent evidence that enhances building technology performance in the context of a powerful design expression. In-depth interviews and case studies are clustered around three research categories: modeling, simulation, and data mining; social and behavioral science and the physical and natural sciences; and including cutting-edge use of neuroscience to understand human response to physical environments. The twenty-two featured thought leaders include: William Mitchell, MIT Media Lab; Fred Gage, Salk Institute; Phil Bernstein, Autodesk; Sheila Kennedy, Kennedy & Violich; James Timberlake, KieranTimberlake; William and Chris Sharples, SHoP Architects; Vivian Loftness, Carnegie Mellon University; John Zeisel, Hearthstone; Paco Underhill, Envirosell; Susan Ubbelohde and George Loisos, Loisos+Ubbelohde Architecture-Energy; Chris Luebke, Arup; Martin Fischer, Stanford University CIFE; and Kevin Powell, GSA.

Coral Reefs Jul 31 2020 "The decline of coral ... if it continues ... will mark the end of one of the great beauties of creation and the end of a great hope that of discovering life forms hitherto unknown on the Earth ... Let us not forget that we are responsible to posterity for the preservation of the beauties of the sea as well as for those on land. We must learn how to make use of the biological and mineral resources of the oceans ... But we must also learn how to preserve the integrity and the equilibrium of that world which is so inextricably bound to our own." - Jacques Yves Cousteau, Excerpt from *Life and Death in a Coral Sea*, 1971 This book reports on the World Bank's 5th Annual Conference on Environmentally and Socially Sustainable Development, which focused on some of the most urgent threats facing coral reefs today, including the growing use of cyanide fishing along some of the richest reefs of the world, unsustainable trade in reef products, and constraints to effective establishment and management of marine protected areas. The proceedings stressed the need for strengthening the policy environment while adopting economic incentives and improved resource valuation techniques, informing management decisions through targeted research and monitoring, and rallying public support through environmental education and the media.

Now You Know Palm Centro Dec 28 2022 The brand new Centro is a full-featured Palm Smartphone designed to target the consumer and youth digital lifestyle market. Palm Centro gives the user voice, text, IM, email and web, in one, small, convenient package. The Centro has a color touchscreen and a full keyboard, so users can say goodbye to those tricky keys on their cell phone. Look up maps and directions on Google Maps, shoot photos and video, meet up with friends on MySpace, check out photos on Flickr, this new smartphone can do almost anything, and this unique, full-color book documents it all with at-a-glance tips, tutorials, and techniques. This pocket-sized and portable guide comes jam-packed with new things you can do on your Centro that are not disclosed in the PDF manuals. Master one topic quickly and easily and then move on to the next because everything is a one-to-five minute tip or technique. Now You Know Centro is meant to be fast and simple, allowing you to practice on your handheld while you read. You'll

learn about the wireless capabilities, e-mail, media and streaming media, accessories, productivity, and more. In minutes, you can watch your skills improve and use what you learn immediately. Now You Know Centro is designed for immediate gratification, not for hour-long reads, the exact way you use your smartphone.
