*The Negro Motorist Green Book* Feb 06 2021 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

*The EuroQol Group after 25 years* Oct 29 2022 The EuroQol Group first met in Rotterdam in May 1987 determined to develop a standardised non-disease-specific instrument for valuing health-related quality of life. The book traces the activities of the Group over the next 25 years. The instrument constructed, eventually named the EQ-5D, was translated into many languages and used in a wide range of countries and settings. The book describes how the instrument's descriptive system was determined, how translation and language issues were handled, and how valuations were provided. Recent developments, in particular a 5-level version (EQ-5D-5L), and a youth version (EQ-5D-Y) are covered. The history of the institutional and administrative framework within which the Group operated is also treated.

*Detection Theory* Nov 05 2020 Detection Theory is an introduction to one of the most important tools for analysis of data where choices must be made and performance is not perfect. Originally developed for evaluation of electronic detection, detection theory was adopted by psychologists as a way to understand sensory decision making, then embraced by students of human memory. It has since been utilized in areas as diverse as animal behavior and X-ray diagnosis. This book covers the basic principles of detection theory, with separate initial chapters on measuring detection and evaluating decision criteria. Some other features include: \*complete tools for application, including flowcharts, tables, pointers, and software; \*student-friendly language; \*complete coverage of content area, including both one-dimensional and multidimensional models; \*separate, systematic coverage of sensitivity and response bias measurement; \*integrated treatment of threshold and nonparametric approaches; \*an organized, tutorial level introduction to multidimensional detection theory; \*popular discrimination paradigms presented as applications of multidimensional detection theory; and \*a new chapter on ideal observers and an updated chapter on adaptive threshold measurement. This up-to-date summary of signal detection theory is both a self-contained reference work for users and a readable text for graduate students and other researchers learning the material either in courses or on their own.

*Effective Documentation* Oct 17 2021 "Best Collection of Essays", NCTE Awards for Excellence in Technical and Scientific Communication. *Effective Documentation* is a major sourcebook that offers technical writers, editors, teachers, and students of technical communication a wide variety of practical guidelines based on often hard to find research in the usability of printed and electronic media. The book's eighteen chapters provide a wealth of material on such topics of current interest as the writing of design manuals, research in cognitive psychology as applied to the design of user manuals, and the organizing of manuals for hierarchical software systems. Included are chapters by such well known scholars in the field as Philip Rubens, Robert Krull, Judith Ramey, and John Carroll. *Effective Documentation* reviews the advice offered by other "how to produce usable documentation" books, describing the different types of usability research and explaining the inherent biases of each type. It goes beyond the actual design of textual and/or electronic media to look at these designs in context, giving advice on effective management ("good management is a requisite of good writing"), on the relationship between document design and product design, and on how to find out who one's readers really are. Advances in the presentation of textual information are explained, with suggestions on how to improve the usability of individual sentences and the design of entire books. The concluding chapters discuss advances in the design and use of online information and offer valuable insights into the use of graphic information and the development and design of information communicated via electronic media. Stephen Doheny Farina is Assistant Professor of Technical Communication at Clarkson University. *Effective Documentation* is included in the Information Systems series, edited by Michael Lesk.
