RatSnakes are rarely, if ever, visible to the public they move among and risk their lives to protect. In fact, thanks to their cover personas, they're often assumed to be members of the clandestine criminal world they investigate. Real-life undercover work is a far cry from the sexy, candy-colored world you've seen in Hollywood movies. Only those strong and clever enough get inside and survive. Vincent A. Cefalu would know. He spent 30 years as an ATF undercover operative, in assignments ranging from the Symbionese Liberation Army to Asian organized crime. He has infiltrated notorious outlaw motorcycle gangs as well as splinter groups of the Ku Klux Klan, and in RatSnakes he provides a transparent look at the organization and the operatives with whom he risked his life. Part field guide, part heart-pounding thrill-ride, Cefalu takes readers on a tour of what it's like to confront death on a daily basis. En route, he gives us a look at the on-the-job techniques of kicking in doors, orchestrating "street theater" to ensnare criminals, and making high-stakes gun buys. His irreverent, explicit stories from the inside are a mix of danger and unexpected hilarity that will have readers laughing one minute and then biting their nails when things break bad. Immersive and brutal, RatSnakes offers an in-depth and

eye-opening look into the lives of an elite group of men and women who volunteer to do things most couldn't and wouldn't stomach. Civilians with common sense and good judgment run from danger, while RatSnakes sprint toward it—smiling. Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. The storied career of ATF agent Cynthia Beebe is told through the lens of six-high profile cases involving bombings, arson, and the Hell's Angels. She includes riveting trial testimony from dozens of key characters, including killers, bombers, arsonists, victims, witnesses and judges. *Boots in the Ashes* is the memoir of Cynthia Beebe's groundbreaking career as one of the first women special agents for the Bureau of Alcohol, Tobacco, Firearms and Explosives, (ATF). A smart and independent girl growing up in suburban Chicago, she unexpectedly became one of the first women to hunt down violent criminals for the federal government. As a special agent for 27 years, Beebe gives the reader

first-hand knowledge of the human capacity for evil. She tells the story of how, as a young woman, she overcame many obstacles on her journey through the treacherous world of illegal guns, gangs and bombs. She battled conflicts both on the streets and within ATF. But Beebe learned how to thrive in the ultra-masculine world of violent crime and those whose job it is to stop it. Beebe tells her story through the lens of six major cases that read like crime fiction: four bombings, one arson fire and a massive roundup of the Hell's Angels on the West Coast.
