Natural Hazards focuses on hazards as the interface between humanity and its needs for space and resources, as well as on the ongoing geologic processes of Earth and features many new Canadian examples and discussions while retaining the best U.S. and international illustrations. The third Canadian edition strikes an ideal balance between the scientific and the human aspects of natural hazards, combining basic scientific principles within a solid social framework. Most students, regardless of their major, need to understand information systems and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need to understand to be successful in the business world. Introduction to Business Information Systems, Third Canadian Edition by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of business value and outlines the innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value. Introduction to Business Information Systems, Third Canadian Edition is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the TechGuides. 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Natural Hazards: Earth Processes as Hazards, Disasters and Catastrophes, Fourth Edition, is an introductory-level survey intended for university and college courses that are concerned with earth processes that have direct, and often sudden and violent, impacts on human society. The text integrates principles of geology, hydrology, meteorology, climatology, oceanography, soil science, ecology and solar system astronomy. The book is designed for a course in natural hazards for non-science majors, and a primary goal of the text is to assist instructors in guiding students who may have little background in science to understand physical earth processes as natural hazards and their consequences to society. Natural Hazards uses historical to recent examples of hazards and disasters to explore how and why they happen and what we can do to limit their effects. The text's up-to-date coverage of recent disasters brings a fresh perspective to the material. The Fourth Edition continues our new active learning approach that includes reinforcement of learning objective with a fully updated visual program and pedagogical tools that highlight fundamental concepts of the text. This program will provide an interactive and engaging learning experience for your students. Here's how: Provide a balanced approach to the study of natural hazards: Focus on the basic earth science of hazards as well as roles of human processes and effects on our planet in a broader, more balanced approach to the study of natural hazards. Enhance understanding and comprehension of natural hazards: Newly revised stories and case studies give students a behind the scenes glimpse into how hazards are evaluated from a scientific and human perspective; the stories of real people who survive natural hazards, and the lives and research of professionals who have contributed significantly to the research of hazardous events. Strong pedagogical tools reinforce the text's core features: Chapter structure and design organizes the material into three major sections to help students learn, digest, and review learning objectives. This text is designed to provide a mathematically rigorous, comprehensive coverage of topics and applications, while still being accessible to students. Calter/Calter focuses on developing students' critical thinking skills as well as improving their proficiency in a broad range of technical math topics such as algebra, linear equations, functions, and integrals. Using abundant examples and graphics throughout the text, this edition provides several features to help students visualize problems and better understand the concepts. Calter/Calter has been praised for its real-life and

engineering-oriented applications. The sixth edition of Technical Mathematics has added back in popular topics including statistics and line graphing in order to provide a comprehensive coverage of topics and applications--everything the technical student may need is included, with the emphasis always on clarity and practical applications. NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Psychology: From Inquiry to Understanding strives to empower readers to apply scientific thinking to the psychology of their everyday lives. It accomplishes this by providing the framework students need to go from inquiry to understanding. Its pedagogical features and assessment tools teach students how to test their assumptions and use scientific thinking skills to better understand the field of psychology and the world around them. 0134379098 / 9780134379098 Psychology: From Inquiry to Understanding, Third Canadian Edition Plus MyPsychLab with Pearson eText -- Access Card Package Package consists of: 0133870286 / 9780133870282 Psychology: From Inquiry to Understanding, Third Canadian Edition 013389486X / 9780133894868 MyPsychLab with Pearson eText -- Valuepack Access Card -- for Psychology: From Inquiry to Understanding, Third Canadian Edition An introduction to the principles and methods of epidemiology in a Canadian context The third edition of Epidemiology for Canadian Students updates the only introductory epidemiology textbook grounded in Canadian research and studies, and it takes into account the COVID-19 pandemic. Through this resource, students will learn core concepts, while also familiarizing themselves with Canadian registries, special-purpose cohorts, provincial health administrators, national statistical agencies and other sources that inform epidemiologic research in Canada. The third edition includes new links to Statistics Canada resources, updated examples with reference to recent Canadian and international literature on topics such as COVID-19, and expanded coverage of causal diagrams. Topics include: - Basic principles and why epidemiological reasoning matters for health professionals - Key parameters in descriptive and analytical epidemiology - Sources of error in epidemiology and ways to quantify and control error - The concept of bias, which is introduced with basic parameter estimates to make it more accessible to students - Key study designs and their vulnerability to error - How to use critical appraisal and causal judgement to evaluate epidemiological studies

Calter, Technical Mathematics with Calculus, Third Canadian Edition will equip instructors with the tools they need to engage and motivate students and then watch them succeed. This text provides real-world, technical applications that illustrate the relevance and usefulness of technical mathematics outside of the classroom. Our third Canadian edition is now four colour and takes a more student-friendly visual approach. It uses tables and diagrams to explain concepts in place of lengthy text explanations and its narrative has been streamlined and revised to a more conversational tone. The result is a text that is easy for students to read and follow. Additionally, Chapter 1 has been revised in response to feedback from students and instructors. It now provides a more succinct review focused on the foundational math skills students need to succeed in the course. Canadian Financial Accounting Cases, 3rd edition has been developed to bridge the gap between the foundational concepts and the real world. Students are introduced to the case study methodology for financial accounting, which focuses on identifying the issue, understanding implications, developing alternatives, and making recommendations. Students must also be able to understand the overall financial reporting landscape and the overall impact of the individual accounting issues. The cases range from introductory level to advanced level and can be used as assignments, exams, or for in-class discussions. The cases have been developed using IFRS (Part I), ASPE (Part II) or ASNPO (Part III) as the accounting frameworks, providing students with exposure to many different types of organizational structures, and have been linked to the CPA Competency Map. Instructors are provided with detailed teaching notes and marking keys that will assist in guiding the class discussions and assessments. Get a clear, logical, and holistic approach to physical examination and health assessment across the lifespan! Using easy-to-follow language, detailed illustrations, summary checklists, and new learning resources Physical Examination and Health Assessment, 3rd Canadian Edition is the gold-standard in physical examination textbooks. This new edition reflects the latest in what is happening in nursing today with coverage of emerging trends, examples of how to document patient assessments using the Electronic Health Record, and new evidence-informed content throughout. It's easy to see why this text is #1 with Canadian nursing students! A two-column format distinguishes normal findings from abnormal findings, and uses colour, step-by-step photos to clarify examination techniques and expected findings. Sectional colour bars segment body systems according to content (Structure and Function, Subjective Data, Objective Data, Documentation and Critical Thinking, Abnormal Findings). Summary checklists offer reviews of key examination steps. Documentation and Critical Thinking sections provide real world clinical examples of specific patients and how to document assessment findings. Abnormal findings tables help you recognize, sort, and describe abnormalities. Separate chapter on Pregnancy provides a thorough foundation for assessing the pregnant patient. Developmental Considerations sections highlight content specific to infants, children, adolescents, pregnant women, and older adults. Promoting Health boxes focus on this key aspect of Canadian health care. NEW! Content covering the Electronic Health Record, charting, and narrative recording provides examples of how to document assessment findings. UPDATED Case Studies provide you with opportunities to test and develop your analytical skills and apply what you've learned. NEW! Approximately 150 normal and abnormal examination photos for the nose, mouth, throat, thorax, and pediatric assessment gives you a fresh perspective on these key system examinations, with cultural diversity and developmental variations. NEW! Social determinants of health considerations cover the shifting landscape of Canada's populations with strategies for integrating social, economic and ethnocultural diversity into your health assessments. NEW! Assessment strategies relevant to Indigenous populations, harm reduction, nutrition, and transgender persons inform practitioners on respectful, complete care. The third Canadian edition of this anthology has been substantially revised and updated for a contemporary audience; a selection of classic essays from earlier eras has been retained, but the emphasis is very much on twenty-first-century expository writing. There is also a focus on issues of great importance in twenty-first-century Canada, such as climate change, the Truth and Reconciliation Commission, the Jian Ghomeshi trial, Facebook, police discrimination, trans rights, and postsecondary education in the humanities. Works of different lengths and levels of difficulty are represented, as are narrative, descriptive and persuasive essays—and, new to this edition, lyric essays. For the new edition there are also considerably more short pieces than ever before; a number of op-ed pieces are included, as are pieces from blogs and from online news sources. The representation of academic writing from several disciplines has been increased—and in some cases the anthology also includes news reports presenting the

results of academic research to a general audience. Also new to this edition are essays from a wide range of the most celebrated prose writers of the modern era—from Susan Sontag, Eula Biss, and Michel Foucault to Anne Carson and Ta-Nehisi Coates. The anthology also offers increased diversity of representation—including, for example, a larger proportion of First Nations writers and women writers than previous Canadian editions. Unobtrusive explanatory notes appear at the bottom of the page, and each selection is preceded by a headnote that provides students with information regarding the context in which the piece was written. Each reading is also followed by questions for discussion. A unique feature is the inclusion of a set of additional notes on the anthology's companion website—notes designed to be of particular help to EAL students and/or students who have little familiarity with Canadian culture. The anthology is accompanied by two companion websites. The student website features additional readings and interactive writing exercises (as well as the additional notes). The instructor website provides additional discussion questions and, for a number of the anthology selections, background information that may be of interest.

Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning and communication. This is in line with the CPA curriculum and the content of this edition and the problem materials is mapped to the CPA. Many students fail to recognize the assumptions, limitations, behavioural implications, and qualitative factors that influence managerial decision making. The textbook is written in an engaging step-by-step style that is accessible to students. The authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors. They utilize features such as realistic examples, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly. Conceptual and applied, with emphasis on analyzing and interpreting Canadian data to make informed business decisions. The book draws students in using a conversational writing style and delivers content with a fresh, exciting approach that reflects the authors' blend of teaching, consulting, and entrepreneurial experiences.

Respected for its scientific accuracy, currency and thoroughness, and for its integration of high quality figures and photos, Christopherson/Byrne/Giles, *Geosystems* Fourth Canadian edition is the name you can trust with the content your students will read. This first Canadian edition of *Crime and Criminology: An Introduction* combines Canadian empirical research, policy, and legal issues to create a thoroughly Canadian text. Ideal for university and college students enrolled in introductory criminological theory courses, the book offers a solid foundation to criminology which unites traditional theories of crime with contemporary approaches and perspectives. By relating theory to everyday Canadian examples and events, students gain a solid grounding in the major theoretical considerations of the nature and causes of criminal behaviour. New discussion on ecology and environmental theories are unique to this edition. Updated references reflect recent research in emerging fields of criminology.

Olmsted/Burk is an introductory general chemistry text designed specifically with Canadian professors and students in mind. A reorganized Table of Contents and inclusion of SI units, IUPAC standards, and Canadian content designed to engage and motivate readers distinguish this text from many of the current text offerings. It more accurately reflects the curriculum of most Canadian institutions.

Instructors will find the text sufficiently rigorous while it engages and retains student interest through its accessible language and clear problem solving program without an excess of material that makes most text appear daunting and redundant. This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. This text highlights human development, brain function, abnormal psychology, and the individual differences in each area as cut-across themes to demonstrate these connections. Also included are two-page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza, study psychology, or listen to music. The art featured in these spreads have been created especially for Psychology Around Us by an award-winning artist with input from faculty on how it will contribute to teaching and learning. Features: Cut Across Connections - Almost every chapter helps students comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life.
