Created with a "student-tested, faculty-approved" approach, ASTRO, Third Canadian Edition is the first and only title that tells the global story of astronomy from a Canadian perspective. Multicultural and interdisciplinary examples range from Inuit, Mesopotamian, Indian, and other non-Western traditions in ancient astronomy to discussions of current developments like CERN, LIGO, and the discovery of Near-Earth Objects. Canadian astronomers and discoveries that have shaped the field are featured throughout, making the subject matter intriguing and more relevant to Canadian students. ASTRO 3CE clearly outlines the important facts and MindTap helps bring them to life. Language Central for Math helps ELLs and struggling students develop the

academic vocabulary necessary to master math. Oftentimes it's the math vocabulary, not the mathematical concepts, that hinder student mastery. Language Central for Math is designed to directly address this issue - and to reinforce the instruction given in the math classroom. The curriculum that serves as the foundation of the program was developed by Fitchburg Public School District (MA), with a goal to provide better Mathematics access to its growing ELL population. Language Central for Math incorporates this curriculum within an ELL instructional framework developed by Dr. Jim Cummins, Pearson Advisor and Professor at Univ of Toronto. The program was designed for easy and flexible implementation: It supplements any core math program. Each lesson can be used either: 1 class/ week (ESL class) or 15-20 minutes/day (before each math class).

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. Sniper is the behind-the-scenes story of one of the most frightening rampages to occur in U.S. history—and how it was stopped. For more than three weeks, the nation watched in disbelief as Washington, D.C., and its surrounding suburbs were held hostage by anonymous gunmen shooting innocent civilians at random. Sniper is the definitive account of those alleged gunmen, John Muhammad

and Lee Boyd Malvo, and the massive manhunt that ended with their capture by a heavily armed SWAT team in an early-morning raid at an interstate highway rest stop. Two Washington Post reporters, Sari Horwitz and Michael E. Ruane, retrace the steps of Muhammad and Malvo from their first meeting on the island of Antigua to Malvo's defiant confession in a Virginia jail. Drawing on exclusive reporting about that confession, internal police documents, and a wide range of law-enforcement sources, Horwitz and Ruane track in remarkable detail the murderous trail Muhammad and Malvo are accused of having followed to the Washington area and reconstruct the eerie way in which the two moved invisibly around the nation's capital in the midst of one of the largest police investigations in U.S. history. Horwitz and Ruane also take you inside the police command center where local and state police, joined by the federal government's most experienced crime fighters, worked desperately to stop the killings, unaware that a fundamental error—investigators were wrongly fixated on a white van—was allowing Muhammad and Malvo to slip through the dragnet. We meet FBI negotiators, veteran detectives, forensics experts, prosecutors, and politicians who faced perhaps the biggest challenge of their careers as they confronted frustrating setbacks, logistical nightmares, and the overwhelming pressure of a high-stakes investigation. In a fast-paced narrative that outdoes even the most acclaimed television cop

shows, Sniper recounts the extraordinary police work that enabled investigators to quickly exploit the clues handed to them by Muhammad and Malvo that finally led to their arrest. Part gripping drama, part real-life portrait of law enforcement at work, Sniper is also a cautionary tale about the vulnerability of American society in an age of terrorism.
