Why does an Anniversary Clock stop Working? Most likely, it is because the suspension spring is broken. I will teach you how to replace it.

Often, the works are dirty, need oiling, or most likely both. When the clock stops, think of it as "the oil light is on." It's a "cry for help." Without oil, the metal parts grind on each other, causing severe wear and damage. Oil also attracts dust, making the oil "gummy" and adding drag to its operation until it can no longer overcome the friction. If a clock is oiled regularly [every three to five years], chances are you will only ever need to re-oil your clock. If the clock is allowed to run until it stops, the only sure way to service it is to remove the works from its case, dismantle the parts, clean, service, and put the movement back together with fresh oil and correct adjustment. This book will teach you how to do all this. In this classic study, Alan Brudner investigates the basic structure of the common law of transactions. For decades, that structure has been the subject of intense debate between formalists, who say that transactional law is a private law for interacting parties, and functionalists, who say that it is a public law serving the collective ends of society. Against both camps, Brudner proposes a synthesis of formalism and functionalism in which private law is modified by a common good without being subservient to it. Drawing on Hegel's legal philosophy, the author exhibits this synthesis in each of transactional law's main divisions: property, contract, unjust enrichment, and tort. Each is a whole composed of private-law and public-law parts that complement each other, and the idea connecting the parts to each other is also latently present in each. Moreover, Brudner argues, a single narrative thread connects the divisions of transactional law to each other. Not a row of disconnected fields, transactional law is rather a story about the realization in law of the agent's claim to be a dignified end-master of its body, its acquisitions, and the shape of its life. Transactional law's divisions are stages in the progress toward that goal, each generating a potential developed by the next. Thus, contract law fulfils what is incompletely realized in property law, negligence law what is germinal in contract law, public insurance what is seminal in negligence law, and transactional law as a whole what is underdeveloped in public insurance. The end point is the limit of what a transactional law can contribute to a life sufficient for dignity. Reconfigured and expanded with a contribution by Jennifer Nadler, *The Unity of the Common Law* stands out among contemporary theories of private law in that it depicts private law as purposive without being instrumental and as autonomous without being emptily formal.
