Surf the Waves of Opportunity Nov 03 2020 Are you managing a business or a business unit or is your goal to achieve such positions? Then this book is for you. It summarizes what I have learned about operational leadership over more than 50 years as a business manager and top management consultant: Operational leadership determines company success. Top management job is to spot the waves of opportunity and lead the company in riding them. Visionary and strategic thinking is required to spot waves. Operational leadership leads the company in riding them. It is like surfing big waves. To spot one is important, but success lies in riding it (operational execution) without falling off the surfboard. For success in operational leadership, you must do five things right, in a never-ending cycle of agile leadership: 1) Set the right operational goals to establish the line on which you want to surf your wave. You only need one single goal. 2) Plan. Build your surfboard. Design the right plan: Focus it on resolving constraints. Write it down on one single page. 3) Execute. Surf your wave. Follow the goal to deliver the obligations outlined in your operational plan. 4) Check. Review progress against your goals and execution of your operational plan. Go back to planning if the operational plans need to be adjusted. 5) Contribute the value required from operational leaders: Lead your Plan-Execute-Check cycle to spin faster than your competitors. Institutionalize the culture of operational excellence. Operational leadership is all about surfing monster waves of opportunity. It strains us to our limits. Yet it is the most fascinating and rewarding task in business management.

The Arrival of the Electric Car Jun 29 2020 (Second Edition)
Are you considering buying an electric vehicle? All of us are

witnessing a once-in-a-lifetime transformation. For over one hundred years, gasoline and diesel fuels have powered ground transportation throughout the world. Now that is changing, and 2023 is the year when most people will recognize that change is happening. This book is a comprehensive, easy-to-understand overview of the passenger EV universe including guides for buying and owning an electric car. The authors discuss choosing, owning and driving an electric car, then explain the features, advantages, benefits and limitations of over 45 EV models including pickup trucks, SUVs, and sedans. "If you have to have a car, make it an electric car. As this book makes clear, they are better than old-fashion vehicles in every way." -Bill McKibben, American environmentalist and climate change authority; co-founded 350.org and spearheaded the fossil fuel divestment campaign resulting in endowments worth more than \$15 trillion stepping back from oil, gas and coal. "Thankfully, now that the electric vehicle R&D "dark ages" are coming to an end and automakers around the world are charging up their EV programs, there's no doubt that we're about to see massive, valuable change in our transportation landscape." -Sebastian Blanco, one of America's leading electric car journalists who has been writing about EVs since 2006.

The Baby on the Fire Escape: Creativity, Motherhood, and the Mind-Baby Problem Oct 22 2019 An insightful, provocative, and witty exploration of the relationship between motherhood and art—for anyone who is a mother, wants to be, or has ever had one. What does a great artist who is also a mother look like? What does it mean to create, not in “a room of one’s own,” but in a domestic space? In *The Baby on the Fire Escape*, award-winning biographer Julie Phillips traverses the shifting terrain where motherhood and creativity converge. With fierce empathy, Phillips evokes the intimate and varied struggles of brilliant artists and writers of the twentieth century. Ursula K. Le Guin found productive stability in family life, and Audre Lorde’s queer, polyamorous union allowed her to raise children on her own terms. Susan Sontag became a mother at nineteen, Angela Carter at forty-three. These mothers had one child, or five, or seven. They worked in a

studio, in the kitchen, in the car, on the bed, at a desk, with a baby carrier beside them. They faced judgement for pursuing their creative work—Doris Lessing was said to have abandoned her children, and Alice Neel’s in-laws falsely claimed that she once, to finish a painting, left her baby on the fire escape of her New York apartment. As she threads together vivid portraits of these pathbreaking women, Phillips argues that creative motherhood is a question of keeping the baby on that apocryphal fire escape: work and care held in a constantly renegotiated, provisional, productive tension. A meditation on maternal identity and artistic greatness, *The Baby on the Fire Escape* illuminates some of the most pressing conflicts in contemporary life.

New Horizons in Research on Sustainable Organisations Aug 12 2021 Environmental sustainability practice and research have advanced over the past decade from novelty to near-mainstream status today. During this environmentally critical time period, sustainability practitioner techniques, such as environmental, energy and social auditing, other sustainability information and related systems, and a wide variety of environmental sustainability approaches have been developed, improved and institutionalised, advancing both the practice and research of environmental sustainability management and policy. However, academics and practitioners in the sustainability field still have widely differing perspectives on what a sustainable organisation is or

might be, but seldom take the opportunity to share these respective sustainability visions, let alone the multiple ways to achieve them. New Horizons in Research on Sustainable Organisations is intended to bridge this gap between academics and practitioners with cutting-edge research from both groups on progress towards sustainability. After working on sustainability-related projects involving other academics, both research- and practitioner-oriented graduate students, consultants, managers and activists, the lead co-editors of this volume saw the need to encourage information exchanges among differing networks of sustainability stakeholders to create a pathway for researchers and practitioners in the general area of organisations and the natural environment to address issues of common interest. There are many networks in the general subject area, but the cross-pollination of ideas between academics and practitioners remains sketchy. New Horizons in Research on Sustainable Organisations is intended to present and encourage such cross-pollination. The chapters in this volume are presented in three subsets, generally proceeding from the most "macro" to the most "micro" in terms of perspective and applicability. However, this arbitrary division belies the integration from macro through meso (or mid-range) to micro levels that is apparent in these studies. Macro approaches typically include wider geographic scopes, greater numbers of stakeholders, and more complex explanatory factors than micro approaches. Each chapter adopts one or more particular sustainability world-view and then grounds these and the other chapter elements within actual organisations. Therefore, the reader is advised to envision not a one-dimensional continuum but rather a circle in which the macro view both feeds back and feeds forward to the micro view. This volume addresses a number of intriguing and important sustainable organisation phenomena such as multiple sustainable

development perspectives, changing environmental politics, environmental management systems variations, voluntary environmental programme performance, complex adaptive systems, and environmental technology development.

Additionally, several models are suggested, such as cultivation, capabilities and business ecology frameworks.

The Car Show Sep 13 2021 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Blimp Pilot Terrorizes Akron (And Other Hot Air) Jun 10 2021 Here's Akron, with attitude. A giant cockroach, ticket-happy traffic cops, sexting teens, bumbling politicians, prima donna sports stars . . . There are few topics that Akron Beacon Journal columnist Bob Dyer hasn't tackled head-on. His biting commentary has earned him followers and foes alike—along with a boatload of awards. In this collection of his best writing, Dyer nearly crashes the Goodyear blimp, drag races in a '64 Plymouth Barracuda, drives a 126-ton locomotive, panhandles on a downtown street corner, surveys the "Great Wall of Fairlawn," dispenses unsolicited advice to LeBron James, and generally waves a red flag at political correctness. Great fun to read—as long as you're not overly sensitive!

Improving Healthcare Using Toyota Lean Production Methods Apr 20 2022 What differentiates this book from other healthcare improvement books is that it is the only currently available book that presents a simple recipe of 46 lean steps for healthcare providers to reduce cost and improve quality. By taking these straightforward steps, healthcare providers can adopt the same lean methods which have enabled companies like Toyota to become so successful. The first part of the book explains cost and quality issues facing U.S. healthcare. From that understanding, the second part then teaches healthcare providers a 46-step recipe to reduce costs and improve quality by using Toyota Lean Production methods. With industry experts citing that as much as 40% of the total cost of healthcare production is attributed to wasteful processes, it is logical that reducing waste will lower costs. This is the basis of this book. Although other books have presented Toyota's lean methods, this book goes further by showing how to directly apply those successful methods to healthcare, where they are sorely needed. This book is intended to be a practical manual for healthcare providers to use to improve quality and reduce costs. It can be a multi-year strategic plan for healthcare

providers to adopt. This second edition includes additional improvement steps and five new appendices of practical examples authored by renowned lean experts.

Photogrammetry Jul 11 2021 Collision Reconstruction

Methodologies - Volume 3A - The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Transformational Servant Leadership May 09 2021 Who needs another book on leadership? After reading Dr. Parolini's manuscript, I concluded that I did. This personal, thoughtful and challenging book takes two well recognized leadership models, puts them in dialog, and synthesizes a more robust model. Using her research, consulting experience, and life story, Dr. Parolini challenges leaders to grow their character as a basis for growing their skills as a leader. This is not a book to skim. The reader will gain the most from interacting with the frequent questions and exercises that link the material with the leader's character and style. Illustrations from the Bible pointedly and powerfully bring home the principles of Transformational Servant Leadership. As you pick up this book be prepared to grow academically, spiritually, and personally. Jay Barnes President, Bethel University There are two kinds of people in the world - 'here I am' kind of people and 'there you are' kind of people. Transformational servant leaders are always other-centered leaders who help facilitate personal and corporate change with high impact. Jeanine Parolini' is a 'there you are' kind of leader whose interactive style will stretch your mind, enlarge your heart, and ignite your desire to better understand and practice Transformational Servant Leadership. I know this because she has consulted with me and our organization to define reality and clarify direction. Learn how to be the new kind of hero that is necessary in our world today through the Parolini Transformation and Servant Leadership Scale included in these pages. Joel Johnson Senior Pastor, Westwood Community Church Dr. Jeanine Parolini serves as a leadership and organizational development coach and consultant. She is
