“Bubbling over with mirth and mystery.” –Dorothy Cannell “A delicious treat!” –Carolyn G. It’s the start of hunting season – and her inn is packed to capacity! What at first seems to be a horrible accident (and insurance nightmare for Magdalena!) could turn out to be a much more sinister event; and when another mishap occurs, Magdalena is certain there is a killer in her group – and it’s up to her to sniff out the culprit...before the world’s most incompetent town sheriff throws her in jail! The book also presents a series of corpus-based case studies illustrating central themes and best practices in the field. There are several tests used in clinical practice

and research worldwide that have been devised to assess the functions subsumed by the frontal lobes of the brain. Anatomical localisation has revealed that the frontal lobes can be divided into sub-regions with different functional domains. As a result, a number of authors working in the frontal lobe literature have made a case for patients with frontal lobe damage to be considered in their distinct subgroups, rather than considered together in one unitary group. As a result, it is important for clinicians and researchers to be made aware of the functions assessed by individual frontal tests and understand which frontal regions might be impaired in their patient groups, as patients with damage to one of these regions will perform poorly on tasks tapping that region yet may perform well on tasks tapping the unaffected regions within the frontal lobes. The 'Handbook of Frontal Lobe Assessment' provides a critical review and appraisal of both the neuropsychological and experimental tests that have been devised to assess frontal lobe functions. It includes many tests that have not been included in previously published neuropsychological compendia. Throughout, the book discusses the available frontal tests in relation to patient and lesion data, neuroimaging data and aging data in order to offer clinicians and researchers the opportunity to choose the best assessment instrument for their purpose. Insights into Mennonite customs and authentic Mennonite recipes mark a mystery set in Magdalena Yoder's Mennonite Inn, the setting for a series of mysterious poisonings involving a congressman, his socialite wife, and a group of animal-rights activists This revised and expanded

edition adds over 300 new expressions that help unlock the meaning of everyday expressions. Both informative and entertaining, the book addresses an important aspect of social communication for people with Asperger Syndrome, who use direct, precise language and 'take things literally'. This dictionary aims to dispel any confusion that arises from the misinterpretation of language. It provides explanations of over 5000 idiomatic expressions and a useful guide to their politeness level. Each expression is accompanied by a clear explanation of its meaning and when and how it might be used. The expressions are taken from British and American English, with some Australian expressions included as well. Although the book is primarily intended for people with Asperger Syndrome, it will be useful for anyone who has problems understanding idiomatic and colloquial English. An essential resource and an informative read; this dictionary will assist in a wide range of situations. This volume is a blend of language and literature papers highlighting linguistic functionality and topicality in poetry, novels, translation and education. It sheds light on the fictionalised reality of a strained official linguistic cohabitation in Cameroon as instantiated in present-day colonial legacy claims. It deals with issues of translation as a stylistic exercise whereby the translator has some creativity licence when rendering the source text into the target language, thus embracing Skopos theory's view of translation as a purposeful activity determined by the target text and audience. This book also looks at an educational conception of translation as opposed to a professional translation curriculum and advocates a

comprehensive needs analysis for translator education in the context of translation teaching at the Advanced School of Translators and Interpreters (ASTI) in Cameroon. The chapters also examine teacher and student discourse in the context of English Language teaching in tertiary education in China and pinpoint a dominant teacher's voice made relevant by a Confucian didactic indexicality, which appears to be a stumbling block to any dialogic classroom discourse, despite a new curriculum promoting communicative language teaching and student-centredness. This book will appeal to academics in the fields of language and literature in general and in Cameroon and China in particular. It will also be a valuable resource for professional translators and those concerned with teaching the subject in academia as it explores a pragmatic conception of translation and envisages it, beyond professionalism, as an academic field.
