Master erwin DM to deliver robust and precise designs for both operational and analytical projects. Steve and Jeff start from the basics, explaining data modeling concepts and how to get up and running with erwin DM (erwin DM). Through a hands-on approach, business

analysts, data professionals, and project managers will learn step-by-step how to build effective conceptual, logical, and physical data models. Complete the stages in identifying essential business requirements, designing the logical data model, transposing those logical modeling objects into physical tables and columns, and even generating the implementation database scripts. This book contains seven parts. Part I provides a foundation in data modeling and Part II a foundation in erwin DM. Part III covers the design layer technique and its application using erwin DM, distinguishing conceptual, logical, physical, and operational data models. Part IV covers entities, domains, attributes, key groups, validation rules, default rules, and subject areas, along with how to implement them using erwin DM. Part V explains the physical data model and how to convert a logical data model to a physical data model in erwin DM. Become confident creating tables, columns, indexes, and views. Part VI reveals advanced features available within erwin DM, including user defined properties, naming standards, forward engineering, reverse engineering, complete compare, report designer, and the bulk editor. Part VII explains several important tools to use in combination with erwin DM, including erwin DM NoSQL, erwin Data Catalog, and erwin Data Literacy. This handy book serves as an introduction to the course of Statics and is intended for first year students taking a degree or diploma in engineering. If Darwin were to examine the evidence today using modern science, would his conclusions be the same? Charles Darwin's *On the Origin of Species*, published over 150 years ago, is considered one of history's most influential books and continues to serve as the foundation of thought for evolutionary biology. Since Darwin's time, however, new fields of science have emerged that simply give us better answers to the question of origins. With a Ph.D. in cell and developmental biology from Harvard University, Dr. Nathaniel Jeanson is uniquely qualified to investigate what genetics reveal about origins. *The Origins Puzzle Comes Together* If the science surrounding origins were a puzzle, Darwin would have had fewer than 15% of the pieces to work with when he developed his theory of evolution. We now have a much greater percentage of the pieces because of modern scientific research. As Dr. Jeanson puts the new pieces together, a whole new picture emerges, giving us a testable, predictive model to explain the origin of species. *A New Scientific Revolution Begins* Darwin's theory of evolution may be one of science's "sacred cows," but genetics research is proving it wrong. Changing an entrenched narrative, even if it's wrong, is no easy task. *Replacing Darwin* asks you to consider the possibility that, based on genetics research, our origins are more easily understood in the context of . . . In the beginning . . . God, with the timeline found in the biblical narrative of Genesis. There is a better answer to the origins debate than what we have been led to believe. Let the revolution begin!

About the Author Dr. Nathaniel Jeanson is a scientist and a scholar, trained in one of the most prestigious universities in the world. He earned his B.S. in Molecular Biology and Bioinformatics from the University of Wisconsin-Parkside and his PhD in Cell and Developmental Biology from Harvard University. As an undergraduate, he researched the molecular control of photosynthesis, and his graduate work involved investigating the molecular and physiological control of adult blood stem cells. His findings have been presented at regional and national conferences and have been published in peer-reviewed journals, such as *Blood*, *Nature*, and *Cell*. Since 2009, he has been actively researching the origin of species, both at the Institute for Creation Research and at *Answers in Genesis*. This is a simple introduction to the basic premise of *Theology of the Body*. It explains how our bodies are symbolic, free, meant for love, and redeemed by Christ. It presents unambiguous reasons for the Church's teaching on premarital sex, contraception, Whether you are planning a romantic Italian getaway, packing a knapsack for your junior year abroad, or just want to engage your Italian business associate in everyday conversation, *Italian Made Simple* is the perfect book for any self-learner. In *CBT Made Simple*, two psychologists and experts in cognitive behavioral therapy (CBT) offer the ultimate “how-to” manual based on the principles of effective adult learning. Structured around these evidence-based principles, this user-friendly guide will help you learn CBT and deliver it to your clients in the most optimal way. CBT is a popular and proven-effective treatment for several mental health disorders, including anxiety, depression, obsessive-compulsive disorder (OCD), post-traumatic stress disorder (PTSD) and anger problems. However, there are no evidence-based learning techniques to teach it—until now. This simple, pragmatic guide offers everything you need to know about CBT: what it is, how it works, and how to implement it in session. *CBT Made Simple* provides a user-friendly, practical approach to learning CBT using up-to-the-minute teaching methods and learning tools—in particular, the “effective adult learning model,” which promotes interactive learning, experiential learning, and self-reflection. Each chapter presents key elements of CBT in clear, accessible language, and includes client dialogues—including explanations of the therapist’s thinking process in relation to various interventions—and clinical examples. Practical exercises are incorporated throughout, enabling you to practice and consolidate your learning. In addition, each chapter mimics the structure of an actual CBT session. If you are a clinician or student interested in learning more about CBT, this book—a new addition to the *New Harbinger Made Simple* series that includes *ACT Made Simple* and *DBT Made Simple*—has everything you need to hit the ground running. Why not make it a part of your professional library?

Dr Richard Beard started off as a Science Teacher at Codsall Community High School, Staffordshire, UK and progressed to being an Advanced Skills Teacher (AST), Gifted & Talented and Science, Technology, Engineering and Mathematics (STEM) Co-ordinator. This supportive role continued for four years and across all subjects within a mixture of age ranges as part of the Codsall High School Federation of Schools. Throughout this period, Richard worked within an outstanding and innovative leadership team to help raise the quality of teaching rapidly from Satisfactory (2007) to Outstanding (2010). In three short years, the team had worked to complete a meteoric rise in the quality of Teaching & Learning. Richard's work during this time and in the present day is heavily influenced by Assessment for learning (AfL). He realised that training related to planning and the use of AfL lacked the simple approach. Confusion often reigned over what is good practice especially in teachers just joining the profession. From this, Outstanding-lessons-made-simple.co.uk was created in the aim of promoting the simple approach: The Outstanding Lesson Framework. The framework was designed to help teachers discover a simple and effective way to teach. The aim being that all teachers can deliver good and outstanding lessons all the time not just in observations with the simple backbone to good teaching: AfL. At the present time, the framework provides the basis for the improvement of the quality of Teaching & Learning across all of the schools Richard has worked at. He continues to use it as an Assistant Headteacher in charge of Teaching & Learning at The Marches School in Oswestry, Shropshire (Outstanding, Ofsted, 2010) whilst he regularly delivers training on the framework and its use to improve the quality of Teaching & Learning across different schools.
