In this unusual Marathi play the playwright weaves a complex narrative with just four characters Begum Barve, a small-time female impersonator who has spent his life playing bit roles in the professional Marathi theatre of the early twentieth century, his exploitative employer Shyamrao, and two clerks, Jawdekar and Bawdekar. Trapped between sensuous longings and the sordid reality of their humdrum existence, they seek redemption in make-believe. Layers of space and time interweave and overlap in this powerfully haunting play as dreams take shape only to turn into nightmares. Begum Barve in the original Marathi was directed by the playwright himself; it has also been performed in Hindi and Gujarati adaptations. This new edition supplements the text with a critical essay and a note on the songs by Urmila Bhirdikar, translator, critic, musicologist, vocalist and Reader, Department of English, Pune University; an interview with the playwright by Dr Shubhada Shelke, scholar and commentator on Marathi theatre, and a note by Amal Allana who directed the play in Hindi. Satish Alekar is Professor and Head, Lalit Kala Kendra, Pune University, and Vice-Chairman, National School of Drama, Nw Delhi. Shanta Gokhale, the translator is also a critic, playwright and author of Playwright at the Centre: Marathi Drama from 1843 to the Present (Seagull Books, Calcutta, 2000). The invited papers form an extensive overview of the state-of-the-art of production management. The themes range from the everlasting hunt for better productivity to the implications of CIM architectures (particularly CIM-OSA) for production management. The other three sections of the book look at the various problems affecting production management. One of the characteristics of modern production management is the need for better principles, systems and techniques for interorganizational production management. Another topic of crucial relevance is the necessity to master not only repetitive manufacturing but also one-of-a-kind product manufacturing. From the managerial point of view, the forecast-based make-to-stock principles have proven insufficient, with market forces demanding fast and reliable deliveries of customer-oriented products. The goals of production management have been re-evaluated as a result. A dark, engrossing, blood-drenched tale of the familiar threats to female power—and one girl ' s journey to regain it. Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men ' s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ' tradition ' that has become a clich é in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men ' s vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
