***This is a book about getting involved with the defense industry by being a contractor and allowing ones self to be able to know what they are getting into. The book is written on how to be a good employee and to present***

***yourself professionally to get the best opportunities available. The book shows what the steps are and what to expect along the way. The US and international defense industrial sectors have faced many challenges over the last twenty years, including cycles of growth and shrinkage in defense budgets, shifts in strategic defense priorities, and macroeconomic volatility. In the current environment, the defense sector faces a combination of these challenges and must struggle with the need to maintain critical aspects of the defense industrial base as defense priorities change and as defense budgets reduce or plateau. Moreover, the defense sector in the US is interconnected both with defense sectors in other countries and with other industry sectors in the US and global economies. As a result, strategic decisions made in one defense sector impact the defense sectors of other countries, as well as other areas of the economy. Given her academic, corporate, and Department of Defense experience as a leading economist and policy-maker, Dr. Nayantara Hensel is perfectly positioned to examine the interrelationship between these forces both historically and in the current environment, and to assess the implications for the future global defense industrial base. The ability of the nation's military to prevail during future conflicts, and to fulfill its humanitarian and other missions, depends on continued advances in the nation's technology base. A workforce with robust Science, Technology, Engineering and Mathematics (STEM) capabilities is critical to sustaining U.S. preeminence. Today, however, the STEM activities of the Department of Defense (DOD) are a small and diminishing part of the nation's overall science and engineering enterprise. Assuring the U.S. Department of Defense a Strong Science, Technology, Engineering, and Mathematics (STEM) Workforce presents five principal recommendations for attracting, retaining, and managing highly qualified STEM talent within the department based on an examination of the current STEM workforce of DOD and the defense industrial base. As outlined in the report, DOD should focus its investments to ensure that STEM competencies in all potentially critical, emerging topical areas are maintained at least at a basic level within the department and its industrial and university bases. The Shooter's Bible Guide to Home Defense was written to help you trade in your fears for a feeling of vigilance, readiness, and pride. This is not a catalog of gimmicks, gadgets, and drills that only a Navy Seal can perform but an intense look at how to fortify your home discreetly and protect yourself from home invaders. Learn how to choose weapons and use them under stress. Gain legal perspective, sharpen your verbal defensive skills, and learn how to recognize criminal intent. If the current climate leaves you feeling abandoned and defenseless, the Shooter's Bible Guide to Home Defense can put you on the path to becoming a proud sentry at the gates of your castle. Firearm expert Roger Eckstine examines how to evaluate the premises, how to choose various security systems, and how to safely interact with aggressors should someone invade your home. Other topics include: Minimizing hiding places Body language and verbal judo Improvised weapons Fight versus flight Coping with children or the elderly during an attack Once again, renowned firearms expert Eckstine delivers helpful tips and provides valuable information. The purpose of this book is to familiarize yourself with the basics that you need to know to defend your home. We live in uncertain times, no matter how hard you try sometimes the fight just comes looking for you. REFUSE TO BE A VICTIM introduces readers to self-defense concepts such as defending against an attack in your car, carrying of a concealed handgun, weaponizing your environment, and much more. Tom Clarke is a 20-year Police Officer (retired) who has served law enforcement assignments ranging from a patrol officer to an undercover agent. Tom discusses these topics as well as mindset, situational awareness, defeating fear, and more as well as introducing readers to training tips and drills designed to enhance their skill sets. Don't fear confrontation, own it. Refuse to be a victim! This is a print on demand edition of a hard to find publication. In FY 2009, DoD spent nearly \$384 billion on contracts. This investment, representing over 70% of total gov't. contract spending, highlights the great need to better manage risk in acquisitions. But DoD has not always managed risks effectively: major systems continue to take longer to develop, cost more, and deliver fewer quantities and capabilities than originally planned. In addition, poorly managed growth in services spending has contributed to disappointing program outcomes. This testimony focuses on: (1) planning of DoD's acquisitions; (2) contract types and the award process, incl. bid protests; (3) outcomes of major acquisition programs; and (4) acquisition and contractor workforce mgmt. It also highlights relevant reforms in each area. K.I.S.S.: Keep Individual Security Simple by Chuck Helmke and Charlotte Guttenberg is a primer for individual security (self-defense). Although K.I.S.S. offers advice and tips useful to any age group or gender, the writers are particularly**

***interested in the concerns of senior citizens and people with disabilities, people who may think they cannot defend themselves. They do this utilizing a fictitious group of senior citizens and the problems they encounter with a gang that is victimizing them. The writers are senior citizens who recognize issues that can easily be overlooked in other training courses by trainers who have yet to experience the tolls of age. Helmke says, "I have tried to address problems in a down-to-earth manner that is readily understandable, regardless of the present training level of students. There is no one-size-fits-all answer to this type of training. "Statistically, the safest defensive solutions are avoidance, deterrence and de-escalation. They have proven to be absolutely the safest way to live your life. However, these three solutions can fail because of something we did not do or because of something totally out of our control. If avoidance, deterrence and de-escalation have failed to defuse a volatile or violent situation and a life-threatening situation is imminent, I have problems with the idea of hand-to-hand combat for most people. The only true equalizer for these types of potentially life-threatening situations, in my humble opinion, is a handgun. That is my defensive choice. "For whatever reasons, if you feel that is not your choice, then I will do my best to address some possible alternatives you may choose to use. That said, I feel the handgun is the best possible defensive weapon for anyone, especially women, senior citizens and people with disabilities. It might prepare you for the day I hope never comes." In the words of some experts in the world of defense who have read K.I.S.S.: Keep Individual Security Simple: Brent Shepherd, Director of Operations at the American Police Hall of Fame Shooting Center says of K.I.S.S.: "This is the most straightforward explanation of applied personal safety principles I have ever read. The concepts and practical applications are easy to follow and this book provides insights that can benefit everyone." Retired Philadelphia policeman, Steven O. Forester says: "This book offers you the opportunity to learn how to be a survivor of the worst thing that could happen to you, the loss of your life or that of your loved ones. The world is changing and not always for the good. Don't let the bad guys win. Give yourself the edge to come out of that situation a winner. Remember, age is just a number, if you prepare your mind and body to do the task, it can be done." Retired deputy sheriff, C.J. Gibson says: "After Mary became a victim of a purse snatching, Arthur and Louise, along with their neighbors decided not to be victims any longer and took some personal initiative to prepare themselves for individual security. In a society plagued with increasing violence, Helmke and Guttenberg provide an easy, fun read and practical advice for anyone interested in taking responsibility for their personal security. They deliver this advice utilizing an elderly couple with physical challenges and limitations often faced by our aging population. Helmke and Guttenberg are passionate and knowledgeable in the task of personal safety. They provide sound, real life, practical concepts to begin your quest of individual security." Diabetes Self-Defense is an easy-to-follow and easy-to-use weapon in the War Against Diabetes. The book has been reviewed for medical accuracy by Jay Krakovitz, MD, a Boulder, Colorado-based physician who also has diabetes. As a fifth degree black belt in Diabetes Self-Defense, Mr. Harritt has used insulin for twenty-two years, yet, as a result of developing and using this simple, six-step program, has had no significant complications. You too can excel in the art of Diabetes Self-Defense, whether you've had diabetes for three months or three decades! You arm yourself so you're hard to kill. Know the law so you're hard to convict. Let's face it, the world isn't always nice. That's why you take steps to protect yourself and your family. Whether it be that shotgun in the corner, the sidearm on your hip, or the pepper spray you gave your daughter, you meet that fundamental responsibility. But if you're like most people, your preparations still lack a critical element. You still need to know how to survive the critical fight that looms after any defensive encounter: the legal battle. The Law of Self Defense provides precisely that critical, missing knowledge. This book includes not just the laws of all fifty states, but how the courts apply those laws. It's a plain-talk analysis that makes the law easy to understand for anyone, not just lawyers. Bestselling author, Andrew F. Branca, is not only a lawyer and internationally recognized legal consultant, but also a life-long member of the gun community--more than 20 years as an NRA Life Member and Instructor, an IDPA Master-class competitor, and a 2nd Amendment absolutist. want to learn how to improving your defensive game? Or looking for ways to solidify your team's defense? This book is your answer. As was said by a great soccer manager, 'Offense wins games; defense wins titles'. This is the case with every level of the professional and amateur game in all countries across the globe. Although there is a correlation between scoring the most goals and winning leagues, it does not seem to be quite as strong as having a watertight defense. So, we might conclude that while scoring goals thrills the crowd and helps a team to win, to be a champion it is even more important that the defense is as strong as it can possibly be. We hope that we have made our case. Defense is key to a team's success. But there is another important reason for this coaching book on a team's defensive unit. We can coach attacking play; set moves, individual skills and so forth can all help a team to create and score chances. However, goals often result from a touch of magic. The thirty-yard screaming shot; the piece of dribbling brilliance, the through pass hit with precision and vision. These are hard attributes to train. Or they can result from an error by the opposition. A mishit clearance, a goal keeping mistake, a positional defect or communication lapse. Consistent training and coaching can make a bigger impact with defense than can be with offensive players. Movement that becomes second nature, knowledge, technique, experience and positional awareness - allied to teamwork and communication - these are the elements that come together to produce a defense hard to breach. They are all factors which the coach can improve with their team through drills, team and individual coaching. It is true, if not often said, that attackers thrill the crowd while defenders win matches, at whatever level we play the game, from professional to Under ten teams playing on a Sunday morning. And it is there, with the match winning defense, that a coach earns his salt. Here's what's included in this book: The 4 Elements of a Soccer Game and how to defend in each of them Which defensive system is better? Man to Man or Zonal? The answer may surprise you The most efficient drills to organize your team for set pieces 9 Different Defensive Formations with Drills to Incorporate Each In your Team How 3 v 2 drills are powerful methods to improve with transition in defensive Individual Goalkeeping Drills and Strategies to Improve Positioning, Communication and Timing The 2 qualities of a great defender and drills to improve them Even if you're a die-hard center forward who believes that all 11 players should attack the opposition goal all day, you'll gain a lot from this book. Emerging economies, social and political transitions, and new ways of doing business are changing the world dramatically. To be the leader in this competitive climate, a defense manufacturing enterprise will require up-to-date capabilities, which include improvements in materials processing, among other things. Also, national and international efforts to mitigate environmentally harmful effects of industrial processes and to improve decision making for handling and disposing of industrial contaminants adds additional requirements for any future efforts. The objective of retaining high-value materials-related manufacturing as a key national competitive capability implies a number of factors. The value of specific manufacturing capabilities could be defined not only in terms of criticality to defense systems but also in relation to technology and knowledge content, importance as a supplier to other industries, and importance to U.S. exports. Requested by Department of Defense (DoD) communities, the National Academies of Sciences, Engineering, and Medicine held a workshop in March 2015 to further explore materials and manufacturing processes. The participants explored changes in the global R&D landscape, technology awareness mechanisms"both DoD's mechanisms and other models"and collaboration models and issues in R&D. This publication summarizes the presentations and discussions from the workshop. The Standing Committee on Defense Materials Manufacturing and Infrastructure (DMMI) conducted a workshop on July 23-24, 2012, to share information and gather perspectives on issues concerning Materials and Manufacturing Capabilities for Sustaining Defense Systems. This workshop, held at the headquarters building of the National Academies, 2101 Constitution Avenue N.W., Washington D.C., was conducted according to the procedures of the National Research Council (NRC) for a convening activity. That is, all workshop participants-including presenters, members of the DMMI standing committee, Reliance 21, invited guests, and visitors-spoke as individuals, and no overall findings, conclusions, or recommendations were developed during or as a result of the workshop. All statements and views summarized in this publication are attributable only to those individuals who expressed them. It is worth noting that the sponsor, Reliance 21, is a Department of Defense group of professionals that was established to enable the DOD science and technology (S&T) community to work together to enhance Defense S&T programs, eliminate unwarranted duplication, and strengthen cooperation among the military services and other DOD agencies. The DMMI standing committee named a workshop planning group to develop the workshop agenda and decide on invited guests and presenters, in accordance with the statement of task approved by the Governing Board of the NRC. The planning group also consulted with the Reliance 21 materials and processing community of interest. The presentations and discussions during the workshop are summarized sequentially in the main part of this report. As an aid to readers, nine themes have been identified by the author that recurred in multiple presentations and discussions. Materials and Manufacturing Capabilities for Sustaining Defense Systems: Summary of a Workshop explains these nine themes and summarizes the two day workshop. Cultural Issues in Criminal Defense discusses approaches to defending cultural issues. The cultural issues are not limited to differences between people of different countries, however. Cultural issues can arise within a country and amongst its people, within a means of collecting and investigating information, and within the way the society perceives the information. All of these factors affect how criminal defense practitioners prepare their cases - from consulting with their clients, to reviewing the investigation by law enforcement, anticipating what information may need to be suppressed, minimized, or emphasized, selecting the jury, attempting to manage how the media reports the information, the direct and cross-examination of witnesses, admission of***

Created in 1982 through the Small Business Innovation Development Act, the Small Business Innovation Research (SBIR) program remains the nation's single largest innovation program for small business. The SBIR program offers competitive awards to support the development and commercialization of innovative technologies by small private-sector businesses. At the same time, the program provides government agencies with technical and scientific solutions that address their different missions. SBIR at the Department of Defense considers ways that the Department of Defense SBIR program could work better in addressing the congressional objectives for the SBIR program to stimulate technological innovation, use small businesses to meet federal research and development (R & D) needs, foster and encourage the participation of socially and economically disadvantaged small businesses, and increase the private sector commercialization of innovations derived from federal R&D. An earlier report, An Assessment of the Small Business Innovation Research Program at the Department of Defense, studied how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs. This report builds on the previous one, with a revised survey of SBIR companies. SBIR at the Department of Defense revisits some case studies from the 2009 study and develops new ones, and interviews agency managers and other stakeholders to provide a second snapshot of the program's progress toward achieving its legislative goals.
