the most interesting and
unusual frogs in the world, and
Michael J. Tyler is
acknowledged to be the
foremost expert on them. This
lavishly illustrated new edition

ecological distress, has become
the subject of a new chapter.
Tyler discusses dietary studies
and explains the effect on frogs
of herbicides, fungicides,
insecticides, and heavy metals.
He provides information, as
well, on an unprecedented
study to control populations of
the Cane Toad, *Bufo marinus*.

What is a stalker? And what kind of life can a woman lead when she knows she is being followed, obsessively and perhaps dangerously, by one? This is the dilemma facing Theresa

Bedell, a reporter in New York, in Rebecca Gilman's tensely fascinating new play. When Theresa goes on an awkward blind date with a friend of a friend, she sees no reason to continue the relationship--but the man, an attractive fellow named Tony, thinks otherwise. While Theresa is at first annoyed yet flattered by his continuing attention, her attitude gradually changes to one of fear and fury when he starts violently to menace her and those around her. In brilliantly delineating the kind of terror a woman in full control of her life feels when everything around her suddenly seems to be a threat, Gilman probes the dark side of relationships in the 1990s with the rich insight and compelling characterizations that have distinguished her earlier plays and made her one of the most exciting young playwrights working today.
