Responsibility of Owner/Employer Reprint. 1954 translation of Konrad Most's classic work on dog training. Most was applying behavioral training principles with dogs long before B.F. Skinner. While his methods may be viewed as harsh by modern dog trainers, the theory behind it was revolutionary for its time and is still applied today. Discover the roots of behavioral training: see the world from a dog's point of view; utilize instinctual behavior in training; use of compulsion and inducement; use of primary and secondary reinforcers. Learn how Col. Most taught: obedience exercises including the recall, jumping and retrieving; guard and schutzhund training; reconnaissance and tracking; scent theory; water work; hunting dog training; dogs for the blind. **Please note that Dogwise does not endorse all of the training methods used in this book; it is a historical document and an early example of modern dog training. Whether you're searching for drugs or a missing person, K9 Scent Training will improve your K9 team's capabilities in the field. Use proven techniques to train your dog for: Scent identification line-ups to indicate a scent connection between crime-scene evidence and a suspect. Tracking along a wide variety of track types, including the cold track, the broken-off track and tracks that run over or under cross-tracks. Detection work for searches in buildings, vehicles, open terrain and more. In this must-have guide for SAR teams and police K9 trainers and handlers, Dr. Resi Gerritsen and Ruud Haak present everything you need to know to build or improve a scent training program. Scent training involves high-

stakes work, and in the case of a search for a missing person, the right training for your K9 can mean the difference between life and death.

Beginning with the science behind odors and how dogs perceive them, Resi and Ruud show you how to harness that knowledge to eliminate training problems and maximize your dog's potential. You'll learn how to start scent training for young dogs using simple exercises before building up to more complex training. Finally, using techniques they've perfected over decades, Resi and Ruud share their specialized, step-by-step programs for advanced scent identification training and tracking. Course documentation is a subject largely ignored in trainer education. Yet it is central to success in the training room. A well-thought-out training manual ensures high-quality presentation first time and every time a course is run; promotes better course management and more professional delivery; facilitates the review and, where necessary, the modification of training materials; in training teams, leads to better trainer management and the correct balance between creativity, flexibility and professional discipline. Learn how to train disciples who know how to train disciples. The importance of improving and maintaining employees' psychological health is now widely recognized by occupational health researchers and practitioners, business leaders, human resource professionals, and policy makers alike. Indeed, a growing body of research has established that psychological well-being is one of the most important factors in job performance. The Mindful and Effective Employee offers an evidence-based workplace training program based on acceptance and commitment therapy (ACT). The program is specifically designed to improve employees' psychological health—as well as their effectiveness at work and in their personal lives—through a combination of mindfulness and values-guided behavioral skills. This book is designed for use by psychologists, coaches, occupational health practitioners, and human resource professionals who are interested in improving employee well-being, performance, and quality of life. The training program described in this book is designed to:

- Promote employee self-awareness
- Help employees find purpose, direction,

and meaning • Offer new ways to improve work and life effectiveness • Help employees identify and pursue valued goals and actions

The must-have optical training system whether you are an optometrist, ophthalmologist, or optical manager responsible for training opticians or are an optician trying to better your skills. Training opticians, new and seasoned, is a daunting task. Are new opticians ready to hit the floor running? Are seasoned opticians remembering the principles that make a good pair of glasses great? These are the questions this book will answer in an easily implemented fashion. Not a text filled with equations and theory never used clinically. This book is written with how you actually practice in mind. Extensive use of short 'Focus Points' help highlight important principles. Understanding of clinical relevance is primary objective of this book, and as such it aims to take you from ordinary to extraordinary in your ability to create and deliver excellence in your optical career. With this book you will be able to analyze every part of a pair of glasses, pick the best frame for a patients face, learn which lens options complement each other (and which ones don't), be able to research contact lens parameter availability, understand symptoms of the most common eye diseases, and separate yourself from the average optician by addressing special

circumstances many opticians may handle incorrectly. In addition to ophthalmic optics, you will learn techniques for improving sales and service to help you stand out in the mind of your patients. For example, making each patient a spokesperson for the practice, how to diffuse the dissatisfied patient, increasing your average dollar sale without being a salesperson, troubleshooting, and many more patient-centered skills necessary to keep your patients coming back again and again. This book is unlike others in that it emphasizes clinical relevancy, has extensive training on improving patient perception of quality and service, has forms for copying and using immediately to improve efficiency and patient care, and helps you formulate goals for both professional and personal achievement. Second edition includes discussion on digital lenses and lab knowledge for the non-lab optician. There are hundreds of books about sales, but how many of them have actually helped anyone become a better salesperson? Hal Becker's Ultimate Sales Book is a sales book and sales training course rolled into one, written by Xerox's former number-one U.S. salesperson and one of America's top sales trainers. It contains a wealth of practical information that many seasoned salespeople have forgotten...and which new salespeople need to master. It includes action steps to help you develop unique and proven selling methods, set goals, list prospects, and even discover your own ways to answer objections. Plus targeted quizzes at the end of each chapter to hone your skills. This is truly the one sales book every salesperson needs. Flying Training Manual Tenth Edition May 2019 Printed Looks at the essential

tools that are necessary to become Batman, including Bat skills, fighting skills, detective skills, and escape skills. It is my hope that this text, when properly used will be of great benefit to the individual aide or aide in training in mastering the required skills that would make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an excellent tool for the home health aide. I strongly encourage all individual who practice and plans to practice as an aide in the home health field to read this book.
